

Polypropylene Cord Fibers

Polypropylene or "poly" rope is an inexpensive, strong, but lightweight rope with many applications. It is waterproof, light enough to float on water and is resistant to mildew. It can be used in waterbased applications as well as for barrier rope, safety rope, utility rope and tie-downs.

Properties of Polypropylene Fiber:

- Light Weight
- Floats on Water
- Resistant to Chemicals
- Resistant to Mildew
- Good Strength
- Economical

Applications of Polypropylene Cord & Rope:

- Barrier Rope
- Utility Rope
- Tie-Downs
- Pet leash Cord
- Ski Tow Lines
